

### Comparing Risky Gambles

The purpose of this research study is to improve our understanding of how people make risky decisions. The questions in this computer-based survey involve comparisons between gambles with the possibility of winning money. All of the situations are hypothetical, so you won't win any real money.

There are no anticipated risks as a result of your participation in this study. We will not ask for your name as part of the study, so your responses will not be linked with your name in any way. The only benefit to you and others as a result of your participation is a greater understanding of decision processes, as explained in the debriefing materials that will be provided at the end of the session. The experiment will last about 30 minutes and you will receive half of one credit hour towards your REP requirement.

If you have questions about the research, or in the extremely unlikely event of a research-related injury, please contact Dr. Mike DeKay, 224 Lazenby Hall, phone 292-1837. If you have questions about your rights as a research participant, please contact the Office of Responsible Research Practices, The Ohio State University, 300 Research Foundation Building, 1960 Kenny Road, Columbus, OH 43210, phone 688-8457.

Your participation in this study is voluntary. Refusal to participate will involve no penalty or loss of benefits to which you are otherwise entitled. You may also discontinue participation at any time without penalty or loss of benefits to which you are otherwise entitled.

If you wish to participate in this study, please click the Next button.

## OSU Money 100 Plays EXP

This study is designed to explore the decisions that people make when the outcomes of those decisions are uncertain. You will be asked to imagine that you are in a specific situation and to make a particular decision. We will also ask you a number of other questions.

The situation may be new to you, and you may not have all the information that you would like. That's okay. We'd like you to tell us what you think anyway. Please give your honest opinion—not what you think you "should" say. These are opinion questions and there are no right or wrong answers.

If you have questions at any time during the study, please ask the facilitator individually.

## OSU Money 100 Plays EXP

Imagine that you are a participant in a study on decision making involving real money and you are asked to choose between two options, each of which involves a series of **one hundred** monetary gambles. On each gamble in option A, there is a 30% chance that you will receive \$110 and a 70% chance that you will get no money. On each gamble in option B, there is a 40% chance you will receive \$70 and a 60% chance that you will get no money.

These two options may be summarized as follows:

Option A:

30% chance on each gamble that you get \$110

70% chance on each gamble that you get no money

Option B:

40% chance on each gamble that you get \$70

60% chance on each gamble that you get no money

Your choice between options A and B applies to all **one hundred** gambles. You may not choose option A for some gambles and option B for others.

**1. On average, would you win more money with Option A or Option B? *Please check one.***

☐ Option A

☐ Option B

**2. Imagine that Andy chooses Option A and plays it ONE HUNDRED times and Brad chooses Option B and plays it ONE HUNDRED times. After ONE HUNDRED plays, what is the percentage chance that Andy will win more money than Brad?**

***Please enter a percentage between 0% and 100%. You may use decimal numbers like 0.1% (for one tenth of 1%) or 99.99% if you wish.***

***For example, type 50% if you mean "fifty percent." Type 0.5% if you mean "one half of one percent."***

**3. If you had to choose one gamble to play ONE HUNDRED times, which option would you prefer? *Please check one.***

|                                   |                       |                                     |                       |                       |                       |                                     |                       |                                   |
